WORK EXPERIENCE

Software Engineer, Orion Innovation, Edison, New Jersey ***08/2023-Present***

- Developed a cutting-edge Gen AI web application using **TypeScript** and **Python** to streamline client company's help desk operations, reducing dependency on help desk teams
- Implemented **AWS Bedrock** (Claude 2) as LLM and **AWS Kendra** for indexing help desk documentation stored in S3
- Initially employed **AWS ElastiCache** for **Redis** for memory caching, transitioned to **AWS RDS** for **PostgreSQL** with **pgvector** extension for enhanced search functionality, efficient vector data management and improved processing time
- Optimized similarity search queries, achieving processing times under 2 seconds from embedding user input to retrieving similar questions from the database or using the input as a prompt for the LLM and inserting new data rows.
- Integrated pre-trained embedding models from **Sentence Transformer** and **spaCy**, later transitioning to embedding model from **Bedrock** for enhanced performance and data governance
- Established **Single Sign-On (SSO)** functionality, enhancing the app's security by limiting access to specific information and documentation for users within designated directory groups

Software Engineer, Grange Insurance Company, Columbus, Ohio ***11/2021-08/2023***

- Owned and managed a discount application system, using **TypeScript** for the frontend and a **Python AWS Lambda function** with AWS SDK applying automatic discounts to insurance policies for students with 3.0 GPA or higher or good driving history
- Improved **RPA** system by modifying the report generation component, eliminating the need for underwriters to manually inform developers of 100% batch processing failure and reducing response time from hours to immediate notification
- Eliminated **1 hour** of daily checkups with an **UiPath RPA** process that monitors emails in specified Outlook accounts, simplifying email account management through a configurable file, providing automated alerts and email handling
- Implemented a **PowerShell** post-implementation testing tool for **OpenText Captiva Capture**, enabling efficient matching of SQL queried data with processed batches, saving **6 hours** per version update

Junior Software Engineer - Grange Consultant, TEKsystems Inc, Dublin, Ohio ***03/2021-11/2021***

- Developed **PowerShell** utility tools to enhance **IBM Content Manager OnDemand**, saving over **2 hours** per deployment and improving directory organization, file management, and data handling in XML and CSV formats
- Automated daily checks by creating **PowerShell** utility tools for **Microsoft Outlook** email organization and implementing an alert system for specific conditions, resulting in time savings of over **2 hours** per week

Web Application Developer, The Ohio State University, Columbus, Ohio ***01/2019-04/2019***

- Crafted a Proctor & Gamble-sponsored web application using **JavaScript**, **HTML**, and **CSS** to provide personalized recommendations for wash types and detergents by analyzing user-provided details, including clothing types and preferences
- Collaborated on consumer needs questionnaire, conducted experiments with MVP, and presented results to stakeholders

PROJECTS

GitHub-LeetCode Component Library | npmjs.com/package/github-leetcode-component | **TypeScript** ***07/2024***

- React component library for displaying user's GitHub contribution and Leetcode submission calendar to web applications with a simple configuration of the server proxy and installation of the package

Personal Blog | theyuniverse.vercel.app | **TypeScript | Next.js** ***04/2024***

Admin Portal | AFFORDABLE Health Inc | **TypeScript | SQL** ***05/2020-08/2020***

TECHNICAL SKILLS

- **Languages**: Python, TypeScript, JavaScript, SQL, PowerShell Script, HTML, CSS
- **Tools / Frameworks**: AWS, ReactJS, Git, pgAdmin 4, Redis, Postman, Microservice Architecture, Agile
- **Certification**: AWS Certified Cloud Practitioner

EDUCATION

Master of Science | Computer Science | **Georgia Institute of Technology** ***08/2024-Present***

Bachelor of Science | Computer & Information Science | **The Ohio State University** ***12/2020***
